

## Cosmetology Transcript

00:00:03:10 - 00:00:27:02

Myrical Nash

I chose to do cosmetology just because, you know, ever since middle school, I kind of had like a passion for hair. So far, we've learned how to do basic roller sets. We've done a lot of thermal work. Theory wise, we learned about anatomy, chemistry. You know, you get the schooling part of it, but also the practical side of doing the hair and stuff.

So it's a nice balance. You actually get to purchase a cosmetology kit, so it has all your basic essentials. A new curling iron, a new flat iron a new blow dryer. You have clips, combs, two mannequin heads, a set of shears and you have clippers. And then in the back of the class is a dispensary with like tons of hair products.

00:00:47:20 - 00:01:17:00

This program, since it is hour based, we go a little bit longer because we have two years to get our licensure. And the state of Michigan requires 1500 hours. So our program goes from 11:35 to 4:05. So it is essential that you have your own transportation because obviously you know, schools aren't running bussing. I recommend it just because it's really a once in a lifetime opportunity, you know, because if you were to take cosmetology school after high school, you'd be paying up to like 36 grand.

00:01:17:02 - 00:01:33:08

Like that's a lot of money. And this is like not even a fraction of a fraction of that. If this is really what you like and enjoy to do, this allows you to pursue that at, for one, a younger age and it's just a great experience.
