

## Programming & Mobile Applications Transcript

00:00:03:22 - 00:00:12:04

Liam Cowan

I was always interested in computer design and programming. Of course, you know, like a lot of kids my age, we wanted to program you know our own game or whatnot.

00:00:12:04 - 00:00:17:13

Aubert Kamdem

I really just wanted to explore like, what is it about? Like, what are the concepts of it and just stuff like that.

00:00:17:17 - 00:00:26:14

Liam Cowan

I now know how to use Java. I know how to use C Sharp. I've learned how to use a multitude of different programs and how it would be like in an actual workplace.

00:00:26:19 - 00:00:35:18

Aubert Kamdem

I've developed my problem solving. I've also developed skills in like, you know, programming in general. I know how to read the language that we use. I also know how to more organize my code better.

00:00:36:03 - 00:00:52:19

Liam Cowan

So a typical day in the programming class, it's kind of your choice to what you want to work on. There's a set kind of like schedule stuff you need to get done, but you're free to work on whatever personal project. As long as we're evolving to coding. So you want to design a robot? Go ahead. You want to start working on a game?

00:00:52:19 - 00:01:00:17

Liam Cowan

Go ahead. You want to start making like a you know, like a power school type thing. Go ahead. It's all up to you. And it's it makes it a lot more fun and engaging that way.

00:01:00:18 - 00:01:20:09

Aubert Kamdem

Just do programing. See how you like it. Because even if it's not something that you want to go into first, it still teaches you like valuable skills. Again, just like problem solving and stuff like that. And also nowadays with everything being technology and stuff like that. So it's, it's pretty useful skill to have regardless of whether you think you're going to go into that field or not.

00:01:20:09 - 00:01:32:03

Liam Cowan

So I'm hoping to learn as much as I can here, go to a college once and more there and then go out into the real world and find a job that would need such skills.
