CAREER TECHNICAL EDUCATION TUITION CHARGE

A. It is the goal of the District to promote college and career readiness within the Ingham ISD service area and contiguous counties.

B. Lansing School District students will be permitted to attend Capital Area Career Center programs at a cost of $1,200 (twelve hundred dollars) per student for open seats which do not displace any students from the eleven districts contributing to the CTE millage. Lansing students will be given preference over non-IISD students.

C. It has been the long standing policy of the Ingham Intermediate School District to accept students, when vacancies permit, who do not displace students from the eleven district districts contributing to CTE from outside Ingham County into CTE programs offered at the Capital Area Career Center. In these situations, the home district of the out-of-service area student will be charged tuition for the half-day CTE program. The tuition rate to be charged to the home district is tied to the charge Eaton ISD pays for services from Lansing Community College for the programs offered at the West Campus.
