TECHNOLOGY AND INFORMATION ACCESS AND USE

Ingham Intermediate School District encourages and strongly advocates the use of electronic information technologies in educational endeavors. The district will make available information resources, including instruction to assist in the development of information management skills. The district will provide equipment or appropriate stipends depending on the need of staff to perform their work in a safe and efficient manner. The superintendent and his/her designee shall develop an appropriate administrative regulation to support the district's endeavors.

The Board of Education is committed to the effective use of technology to both enhance the quality of student learning and the efficiency of District operation.

This policy, along with the Student and Staff Technology Acceptable Use and Safety policies, and the Student Code of Conduct, further govern students’ and staff members’ use of their personal communication devices. Users have no right or expectation of privacy when using District Technology Resources (including, but not limited to, privacy in the content of their personal files, e-mails and records of their online activity when using the District’s computer network and/or Internet connection).

The Board regulates the use of District Technology and Information Resources by principles consistent with applicable local, State, and Federal laws, and the District’s educational mission. This policy and its related administrative guidelines and any applicable employment contracts and collective bargaining agreements govern the staffs’ use of the District’s Technology and Information Resources and staff’s personal communication devices when they are connected to the District’s computer network, Internet connection and/or online educational services/apps, or when used while the staff member is on Board-owned property or at a Board-sponsored activity. (See Policy 4612.00-R2)
