BLOODBORNE PATHOGENS

Administrative regulation for the control of bloodborne pathogens:

A. The superintendent and/or his/her designee shall develop an exposure control plan to assist the district in protecting staff that may be exposed to bloodborne pathogens during the course of their employment. The superintendent and/or his designee will:

1. Develop a bloodborne pathogens exposure control plan which shall include the following:
   a. Explanation and determination of what constitutes an exposure.
   b. Specifically sets forth a schedule and method of compliance with federal and state requirements.
   c. Describes the forms of personal protective equipment which are available and how they shall be utilized by appropriate staff.
   d. Explains the training to be implemented.
   e. Describes how this information will be communicated with staff.
   f. Describes the immunization process.

2. Develop post exposure evaluations and follow up procedures.

3. Establish record keeping procedures which meet the requirements of OSHA 29 CFR 1910.1030.
