STUDENT ASSESSMENT

The Board of Education is desirous of all students achieving their full potential. The District shall, in compliance with laws and rules of the State Board of Education, assess student achievement and needs in designated subject areas in order to determine the progress of students and to assist them in attaining District goals.

The Superintendent shall promulgate appropriate administrative regulations to effectuate the Board direction for students attending programs that fall under the legal requirements.

The Board of Education shall, in compliance with law and rules of the State Board of Education, assess student achievement and needs in designated subject areas in order to determine the progress of students and to assist them in attaining District goals.

Each student's proficiencies and needs will be assessed by staff members upon his/her entrance into the District and annually or more frequently, as required by law, thereafter. Procedures for such assessments will include, but need not be limited to, teacher observation techniques, cumulative student records, student performance data collected through standard testing programs and/or diagnostic reading assessment systems, student portfolios, and physical examinations.
