STUDENT SECLUSION AND RESTRAINT

The Board is committed to providing the framework for organizational supports that result in effective interventions based on team-based leadership, data-based decision-making, continuous monitoring of student behavior, regular universal screening and effective on-going professional development. The District is committed to investing in prevention efforts and to teach, practice and reinforce behaviors that result in positive academic and social outcomes for students.

In the event that staff members need to restrain and/or seclude students, it must be done in accordance with this policy, which is intended to:

A. promote the care, safety, welfare and security of the school community and the dignity of each student;

B. encourage the use of proactive, effective, evidence and research based strategies and best practices to reduce the occurrence of challenging behaviors, eliminate the use of seclusion and restraint, and increase meaningful instructional time for all students; and

C. ensure that seclusion and restraint are used only as a last resort in an emergency situation and are subject to diligent assessment, monitoring, documentation and reporting by trained personnel.

In furtherance of these objectives, the District will utilize Positive Behavioral Interventions and Supports (PBIS) to enhance academic and social behavior outcomes for all students. PBIS implemented by the District will include socially valued and measurable outcomes, empirically validated and practical practices, systems that efficiently and effectively support implementation of these practices, and continuous collection and use of data for decision-making.
